BIRD *Chromalin*

See how the color and pattern of Chromalin go right through the entire wearing surface all the way down to the backing. Chromalin will keep its charming design and color, and the same satin smooth finish throughout its long life.

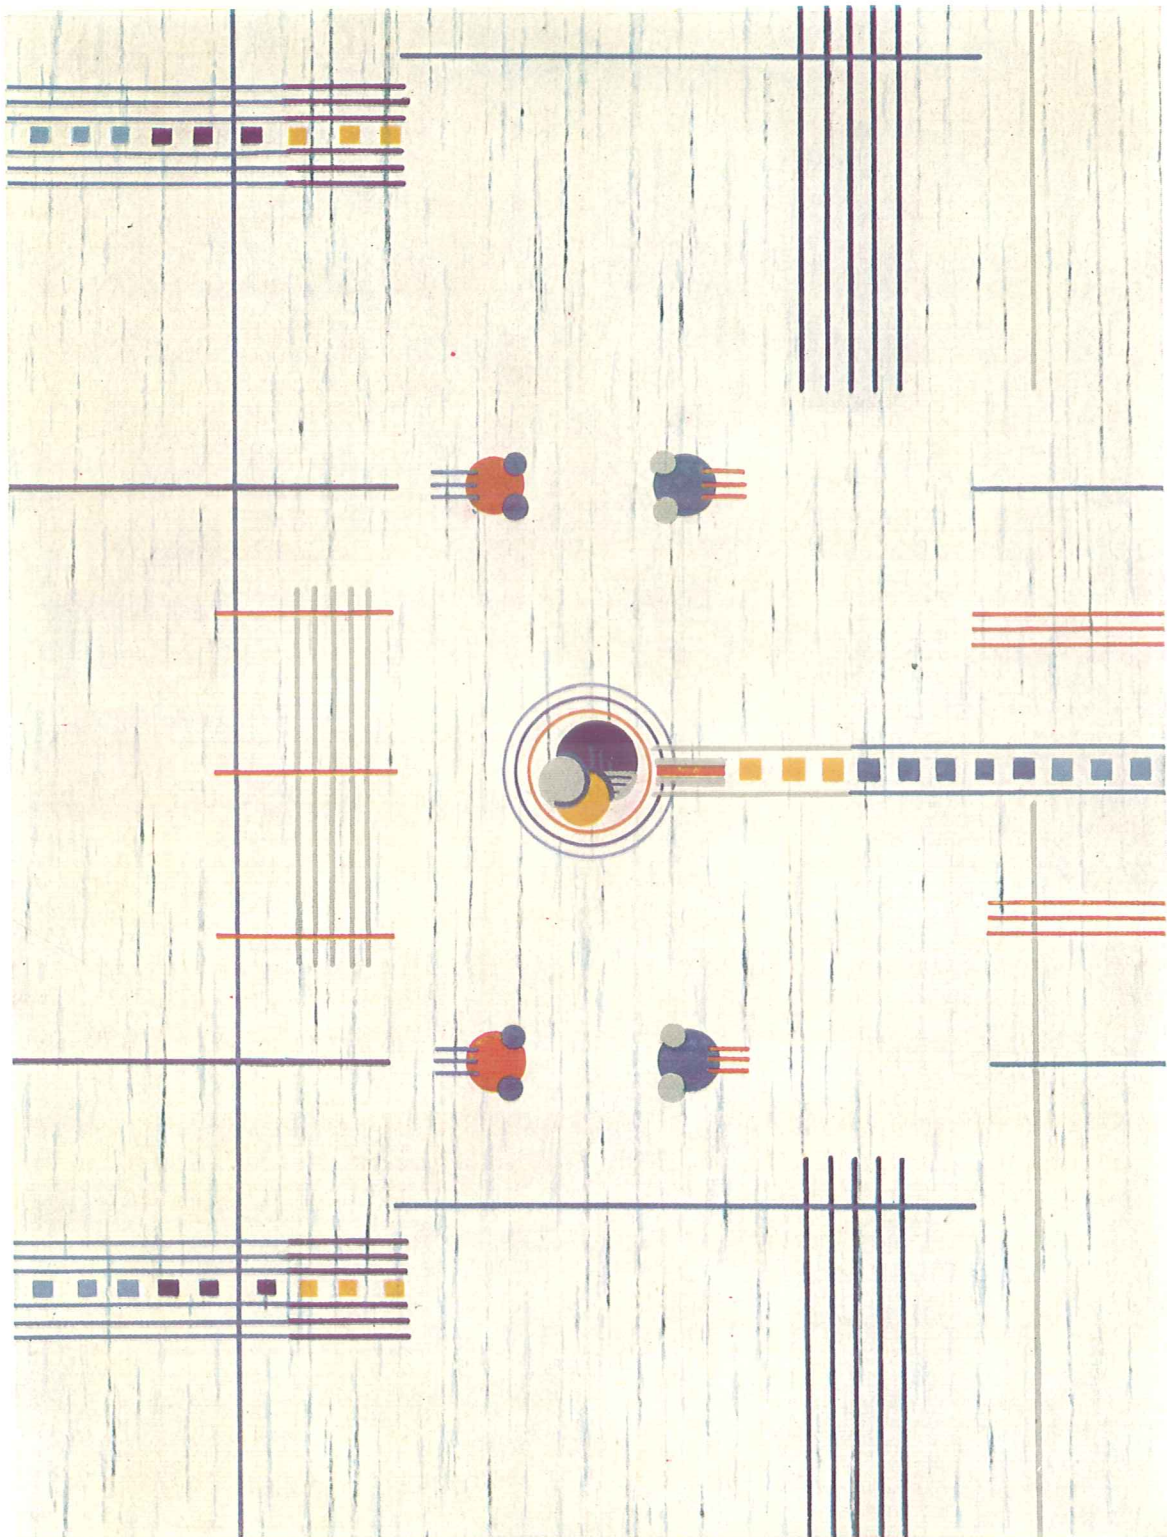

A typical Chromalin floor using standard assembled border material and ready to lay Chromasets.

BIRD . . . as an *Institution*

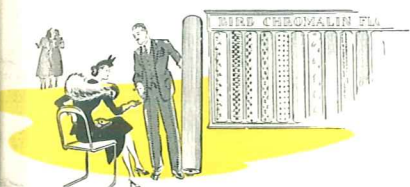

Founded in 1795, the continuous success of Bird and Son, inc. has proved the sound principles upon which they make and distribute their products. A long time in business is something which may mean much, and when coupled with a continuous record of quality production, with more and more dealers handling our products, does mean a great deal.

Bird's reputation for quality has been made possible by two things:

- 1.—Our determination to make good products.
- 2.—The fact that we have equipped ourselves to make these products from start to finish, and control production operations at every stage.

You will find in Bird Floor Coverings uniformity, toughness, high gloss, fast colors, and extreme surface smoothness.

Your recollection of good quality will remain long after the price is forgotten.
